noa

Terms & Conditions

1. Content Source & Moderation

All content displayed on *noa* is sourced from public Farcaster channels. As such, *noa* inherits the moderation policies and content standards of those channels. *noa* does not independently curate or moderate content beyond what is made publicly available via Farcaster. Users are encouraged to report any concerns to the relevant Farcaster channel moderators or, if necessary, to *noa* for review.

2. Copyright & Ownership

noa does not claim ownership or rights over any content it displays. All artworks and related materials remain the sole intellectual property of their respective creators. By using *noa*, you acknowledge that all copyrights belong to the original artists and are fully respected and retained.

3. Use of the App

noa is a free tool that replaces your browser's new tab page to showcase art. It does not require account creation or submission of personal data. Use of *noa* is voluntary and intended solely for personal, non-commercial appreciation of art.

4. Privacy

At this time, *noa* does not collect, track, or store any user data. If data tracking or analytics are introduced in the future, users will be notified, and all activities will comply with applicable laws and regulations. All content is sourced from publicly accessible information.

5. No Liability

noa is provided "as is," without warranties of any kind, express or implied. The developer(s) make no guarantees regarding availability, performance, or the accuracy of displayed content. *noa* assumes no responsibility for any issues,

damages, or losses arising from the use of the app or from third-party content accessed via the Farcaster protocol.

6. Content Removal
Artists who do not wish to have their work displayed on *noa* may request removal by contacting the developer(s) via direct cast on Warpcast.

7. Authentication & User Identity
noa offers optional user authentication via "Sign in with Neynar" which connects to your Farcaster account. When using this feature:

a) Authentication Data: noa uses the Neynar API to authenticate your Farcaster identity. Your authentication credentials are processed by Neynar and not stored directly by noa.

b) b) Local Storage: Limited authentication information (such as your FID, username, and profile picture URL) is stored in your browser's local storage to maintain your session. This data is only stored on your device and is not transmitted to our servers.

c) c) Reaction Permissions: When signing in, you grant permission for noa to send "likes" and "recasts" to Farcaster on your behalf. These actions are processed through Neynar's API using the temporary authentication session established during sign-in.

d) d) Data Usage Limitations: Your authentication session is used solely for enabling social interactions with content displayed in noa. No additional user data is collected, tracked, or stored on our servers.

e) e) Session Control: You can sign out at any time, which removes all authentication data from your local device. You may also revoke noa's access directly through Neynar's security settings.

f) Third-Party Service: The authentication process relies on Neynar as a third-party service. By using this feature, you accept Neynar's Terms of Service and Privacy Policy in addition to noa's terms.
